**Out of Sight is NOT Out of Mind ...**

OUT OF SIGHT IS NOT OUT OF MIND SOMETIMES ...PLASTIC POLLUTION HARMING MOTHER EARTH

www.motherplanetearthch.com

*Though plastics and its innovations have ushered in convenience and advances, its very nature is rife with contradiction Thus we have an incredibly enduring material that is often used just once before being thrown away. This creates a big global plastic pollution problem for the environment. The majority of plastic ends up in landfills where it remains indefinitely that harms the environment & releases toxins that pollute our soil and water.*
